Art Unit: 1624

Applicant's amendments and remarks filed 7/9/03 have been received and reviewed.

Claims 1-9, 12-14 and 27-30 are now pending in this application.

Improper Markush Rejection

Claims 1-9, 12-14 and 27-30 are again rejected under a judicially created doctrine as being drawn to an improper Markush group, that is, the claims lack unity of invention. The basis of this rejection is the same as given in the previous office action and is incorporated herein fully by reference. The claims lack "a community of chemical or physical characteristics" which justify their inclusion in a common group, which inclusion is not repugnant to principles of scientific classification" In re JONES (CCPA) 74 USPQ 149 (see footnote 2). The instant claims do NOT have a significant structural feature.

Note that compounds, corresponding compositions, a method of use and a process of making that are of the same scope are considered to form a single inventive concept under PCT Rule 13.1, 37 CFR 1.475(d). The claims are still not drawn to compounds, corresponding compositions, a method of use and a process of making that are of the same scope.

Claim Rejections - 35 USC § 112

Claims 1-9, 12-14 and 27-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The metes and bounds of the compounds embraced by the process claims is undeterminable. One skilled in the art cannot say which derivative is intended and which one is not.

Art Unit: 1624

Claims 1-9, 12-14 and 27-30 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification is not adequately enabling for the scope of the compounds claimed. The claims are not drawn in terms of a recognized genus but are directed to a more or less artificial selection of compounds.

There is no reason why a claim drawn in this way should not be limited to those compounds which are shown to be both new and useful. An Applicant is not entitled to a claim for a large group of compounds merely on the basis of a showing that a selected few are useful and a general suggestion of a similar utility in the others."

The instant scope is enormous, in the billions of compounds, and therefore one compound within its scope is not remotely representative of such a scope. See MPEP 2164.03.
